Q11. If all the digits in each of the numbers are arranged in descending order within the number, which of the following will form the lowest in the new arrangement of numbers?

- (a) 879
- (b) 483
- (c) 656
- (d) 839
- (e) 274

Q12. If all the numbers are arranged in ascending order from left to right, then which of the following will be the sum of all the three digits of the number which is exactly in the middle of the new arrangement?

- (a) 17
- (b) 15
- (c) 14
- (d) 13
- (e) 19

Q13. What will be the resultant of third digit of the lowest number is multiplied with the second digit of the highest number?

- (a) 27
- (b) 40
- (c) 20
- (d) 45
- (e) 28

Q14. If the positions of the second and the third digits of each of the numbers are interchanged, how many odd numbers will be formed?

- (a) None
- (b) Four
- (c) Two
- (d) Three
- (e) One

Q15. If one is added to the first digit of each of the numbers, how many numbers thus formed will be divisible by three?

- (a) None
- (b) One
- (c) Three
- (d) Two

Directions (71-80): Read the following passage carefully and answer the questions given below it. Certain words are given in bold to help you locate them while answering some of the questions.

Once upon a time, in a village far away, there lived six blind men. One day the villagers were very excited, and when they asked what was happening they told them, "Hey, there is an elephant in the village today!" They had no idea what an elephant was, and so they decided, "Even though we will not be able to see it, we can feel it. Let's go." So, they all went to where the elephant was, and each of them touched it: "Hey, the elephant is a pillar," said the first man, touching its leg. "Oh, no! it is like a rope," said the second man, who was touching the tail. "Oh, no! it is like the branch of a tree," said the third man, touching the tusk of the elephant. "It is like a big hand fan" said the fourth man, who was touching its ear. "It is like a huge wall," said the fifth man, touching the side of the elephant. "It is like a pipe," said the sixth man, touching the trunk of the elephant.

They began to **argue** about what the elephant was like, and each of them **insisted** that he was right. They were getting angry, and fists were about to fly, when a wise man, who had come to see the elephant asked what the matter was. They replied, "We cannot agree what this elephant looks like," and each of them told the wise man what he thought the elephant was like. The wise man smiled and calmly explained to them, "You are all correct. The reason that each of you experienced it differently is because you touched a different part of the elephant. Actually the elephant has all these features: Its legs are like pillars, its tail is like a rope, its tusks are like the branches of a tree, its ears are like a fan, and it has a trunk, that is just is like a pipe.

"Oh!" the blind men said, and there was no more fighting. They felt happy that they had all been right. The **moral** of this story is that even if you don't agree with someone, there may be some truth to what they say. Sometimes we can see that truth and sometimes we can't, because they have a different **perspective** to us, but rather than arguing like the blind men, we should realise that they have their own experiences that make them think this way. If we can accept this, we are much less likely to get into violent arguments.

Q71. Why did the different villagers were experiencing the elephant differently?

- (a) As they were blind.
- (b) As they wanted to argue
- (c) As they were touching different features of the elephant.
- (d) Both (a) and (c)
- (e) All of the above

Q72. What was the reason behind the argument among the blind men?

- (a) They wanted to take the elephant with themselves.
- (b) They were stubborn and therefore were inconsiderate towards each other.
- (c) They have different opinions regarding elephant
- (d) They were very possessive towards elephant
- (e) Everyone wanted to feel the elephant first.

Q73. How the matter was solved by the wise men?

- (a) by telling them about the elephant
- (b) by explaining them the function of elephant.
- (c) by explaining them that they touched different parts of the elephant.
- (d) by explaining different features of the elephant
- (e) All of the above

Q74. What lesson we learn from this story?

- (a) We should live in unity
- (b) we should be submissive towards each other
- (c) We should respect each other's opinion
- (d) we should accept the opinion of the other person rather than arguing.
- (e) All of the above
