Solutions

S1. Ans.(d)

Sol. In the mesh topology, each computer is connected to the other with a separate physical link in a network. It is most reliable topology as the network does not get down in case one of the nodes is failed.

S2. Ans.(c)

Sol. Software piracy is the illegal copying, distribution, or use of software.

S3. Ans.(a)

Sol. EBCDIC stands for Extended Binary Coded Decimal Interchange Code. EBCDIC is a 8-Bit code with 256 different representations of characters. It is mainly used in mainframe computers.

S4. Ans.(b)

Sol. A home page is the main page or the introductory page of a website, typically serving as a table of contents for the site.

S5. Ans.(a)

Sol. A hyperlink, or simply a link, is a reference to data that the reader can directly follow either by clicking, tapping, or hovering. Hyperlinks are found in nearly all Web pages, allowing users to click their way from page to page.

S6. Ans.(c)

Sol. Spoofing: It is a type of scam where an intruder attempts to gain unauthorized access to a user's system or information by pretending to be the user. The main purpose is to trick the user into releasing sensitive information.

S7. Ans.(a)

Sol. Page orientation is the way in which a rectangular page is oriented for normal viewing.

S8. Ans.(b)

Sol. Digital subscriber line (DSL or digital subscriber loop) is a family of technologies that are used to transmit digital data over telephone lines.

S9. Ans.(e)

Sol. A hub contains several ports for connecting multiple computers to form a small network. A simple hub is also called a concentrator.

S10. Ans (d)

Sol. A blog is a regularly updated website or web page, typically one run by an individual or small group, that is written in an informal or conversational style.
