## Solutions

### Solutions (1-5):

(i) From the conditions, M's salary is more than only 2 persons and he belongs to W. The one who belongs to X, his salary is more than N's salary but less than O's salary, means neither O nor N belongs to X. The one who likes red, belongs to X. K belongs to Y and N likes green., so either J or L likes red. N is not the person who gets lowest salary. J's salary is 22k. The one who has highest salary, gets 33k and likes blue. O doesn't like blue. The one who has lowest salary gets 15K.

#### Case 1

Persons	City	Colour
J	X	Red
K	Y	
L		
M	W	
N		Green
O		

#### Case 2

Persons	City	Colour
J		
K	Y	
L	X	Red
M	W	
N		Green
O		

For case 1 --- (33k) > O > J(X) (22k) > M > N > --- (15k)

For case 2 ---- (33k) > O > L(X) > M > N > ---- (15k) this case will be eliminated because no place is left for J, J gets 22k means he is not the person who gets highest or lowest salary.

(ii) The one who gets 25k likes pink and belongs to U, so O likes 25k this is the only possibility. L doesn't belong to V, so L belongs to and N belongs to V. The one who likes white doesn't belong to W. J's salary is more than L, so L gets lowest salary and K gets highest salary, hence K likes blue, L likes White and M likes grey. We get final solution.

Persons	City	Colour
J	X	Red
K	Y	Blue
L	Z	White
M	W	Grey
N	V	Green
O	U	Pink

$K(33k) > O(25k) > J(22k) > M > N > L(15k)$

### Solutions (6-10):

(i) B sits 2<sup>nd</sup> to the left of A. H's age is a perfect square. B and A, who is not the youngest face opposite direction. A, who is 6 years younger than G. H's age (36 yrs) is a perfect square, so we can conclude that A is 24 yrs and G is 30 yrs. The one who is 30yrs old sits 3<sup>rd</sup> to the right of B. F sits 2<sup>nd</sup> to the right of G but doesn't sit just near to B. Both the immediate neighbours of G face opposite direction of G. The one whose age is perfect cube faces inside and sits opposite to E, who is not an immediate neighbour of F, hence we get 2 possible cases.

Case-1

Case-2

(ii). Not more than 2 persons who sit together face same direction, so case 2 will be eliminated. H doesn't sit just near to G. The one who is oldest faces inside, so E is oldest. Rest persons will face outside. Difference between ages of D and C is 5yrs, so B's age is 19yrs. Youngest person is not an immediate neighbour of E. Either C or D is youngest. We get the final solution.

**Solutions (16-20):**

**For step-I,** both the digits of 1<sup>st</sup> block is written as, 1<sup>st</sup> digit of block-1 of the Input is added with 1<sup>st</sup> digit of block-4 of the Input same as 2<sup>nd</sup> digit of block-1 is added with 2<sup>nd</sup> digit of block-4. This process is same for Block-2 and Block-3 in step-1.

**For step-II,** All 1<sup>st</sup> digit of each block is added and that sum is written in 1<sup>st</sup> block and all 2<sup>nd</sup> digit of each block is added and that sum is written as 2<sup>nd</sup> block.

**For step-III,** Half of the addition of 1<sup>st</sup> and 2<sup>nd</sup> digit of each block.

**For Step- IV,** Sum of both numbers of Step-3.

So,

**INPUT: 62 33 15 31 21 14**

Step-1: 93 54 29

Step-2: 16 16

Step-3: 3.5 3.5

Step-4: 7

S19. Ans. (d)

S20. Ans. (b)

S21. Ans.(e)

**Sol.** From I statement alone or from II statement alone we cannot find any relation between A and S but from both the statements we can conclude A is less than S.

S22. Ans (e)

**Sol.**

S23. Ans.(d)

**Sol.** From both the statements we cannot comes to any conclusion so neither from I nor from II we can't find who is the shortest.

**S24. Ans.(a)**

**Sol.** From I, We can conclude that M is towards northeast of Q.

From II, we can't conclude the direction of M with respect to Q, as there is no fixed place of M.

**S25. Ans (e)**

**Sol.** By combining both the statement together we can find the solution.

**Solutions (26-30):**

Symbol	Meaning
©	<
@	≤
%	>
\$	≥
#	=

**S26. Ans.(c)**

**Sol.**  $A = B < T = M > F = G$

I.  $A \text{ © } F$  (False)

II.  $B \$ G$  (False)

**S27. Ans.(a)**

**Sol.**  $M = R \geq S > T \geq K \leq L$

I.  $M \% T$  (True)

II.  $L \$ S$  (False)

**S28. Ans.(b)**

**Sol.**  $W < D \leq C \leq E < H = N$

I.  $N \$ D$  (False)

II.  $W \text{ © } N$  (True)

**S29. Ans.(d)**

**Sol.**  $W \leq D < E \geq R = S < K$

I.  $R \# W$  (False)

II.  $R \% W$  (False)

**S30. Ans.(c)**

**Sol.**  $F \geq J = K > U \geq V < N$

I.  $N \$ J$  (False)

II.  $N \text{ © } K$  (False)
