Solutions (56-60):

This coding decoding question is based on the latest pattern, following logic are applied in this question to decode the code.

(i) The first number of the code represents the numeric value of 1st alphabet of the given word. (A=1, B=2.....Z=26)

(ii) If the number of letters in the word is even then “#” symbol is used and if the number of letters in the word is odd then “&” symbol is used.

(iii) The number at the end of the code is the numeric value of the opposite alphabet of the last letter in the given word.

Tom	11 th	Black
Rohan	2 nd	White

S61. Ans.(b)**S62. Ans.(a)****S63. Ans.(c)****S64. Ans.(e)****S65. Ans.(d)****Solutions (66-70):**

Students let us understand the Logic behind this Question and let's understand how to solve it. As a first step let's first understand the logic behind the Output. If you will see the final output you will observe the following:

(i) The machine rearranges one word and one number in each step.

(ii) The words are arranged in descending order based on the number of vowels in the given word. If two words contain the same number of vowels, then they are arranged in alphabetical order from left to right in each step.

(iii) While the numbers are arranged in decreasing order from left to right alternatively, even number first, followed by prime number alternatively.

Now lets take the arrangement given in the Question

Input: rock 31 rain 13 40 stock 86 takes 72 demotion worship 29

Step I: demotion rock 31 rain 13 40 stock takes 72 worship 29 86

Step II: demotion rain rock 13 40 stock takes 72 worship 29 86 31

Step III: demotion rain takes rock 13 40 stock worship 29 86 31 72

Step IV: demotion rain takes worship rock 13 40 stock 86 31 72 29

Step V: demotion rain takes worship rock stock 13 86 31 72 29 40

Step VI: demotion rain takes worship rock stock 86 31 72 29 40 13

Solutions (146-150):

In this new pattern Input-Output question only one word and one number is arranged in each step. Let us understand the logic behind it- In each step the words are arranged from the left end while the numbers are arranged from the right end.

For words- words are arranged alphabetical order (English dictionary) from left end with each consonant of word is replaced by its second succeeding letter according to alphabetical series while there will be no change in each vowel of the word and same will be followed in further steps.

For numbers- Numbers are arranged in descending order from right end in such a way that each number is replaced by addition of both the digits of the number.

Input- world 66 tourism 39 destination 43 excellence 25

Step-I: feuvipaviop world tourism 39 43 excellence 25 12

Step-II: ezeennepee feuvipaviop world tourism 39 25 12 7

Step-III: voutiuo ezeennepee feuvipaviop world 25 12 7 12

Step-IV: yotnf voutiuo ezeennepee feuvipaviop 12 7 12 7
