CONTENTS

1 Software & Hardware 6

1. Introduction 6
2. Software 8
3. Hardware 10
4. Basics of Memory 13
5. Ports 14
6. Types of Computer 14

PRACTICE SET 16

SOLUTIONS 19

2 DBMS 20

1. Introduction 20
2. Database Architecture 23
3. Entity-Relationship Model 24
4. Relational Database Management System 31
5. Normalization 34
6. Structured Query Language 43
7. Beyond MySQL 57
8. Transaction Control 59
9. Deadlock Handling 64

PRACTICE SET 65

SOLUTIONS 69

3 DATA WAREHOUSING & DATAMINING 70

1. Data warehousing: 70
2. Data Mining: 74

PRACTICE SET 75

SOLUTIONS 78

4 OPERATING SYSTEM 80

1. Introduction 80
2. Process Management: 84
3. Memory Management: 103
4. File System: 106
5. INPUT- OUTPUT system 108
6. Directory system/structures: 109
7. Short Introduction of UNIX operating system: 109

PRACTICE SET 110

SOLUTIONS 114
5 Networking 115
1. Networking 115
2. Data Communication: 118
3. Networking Devices: 122
4. Networking Switching: 123
5. Network Models: 123
6. Internet 132
7. Some Important Networking Protocol 133
PRACTICE SET 137
SOLUTIONS 140
6. Information Security 141
1. Introduction 141
2. Security Threats and Malwares 143
3. Botnets 145
4. Authentication and Authorization 146
5. Cryptography 146
6. Firewall 150
7. Proxies 152
8. Antivirus Software 152
9. Intrusion Detection System (IDS) 153
10. Vulnerability Scanners 153
PRACTICE SET 154
SOLUTIONS 157
7 Web Technology 159
1. Introduction 159
2. Scripting and Markup Languages 159
3. HTML 159
4. XML 169
5. Proxy 172
6. Common Gateway Interface (CGI) 173
PRACTICE SET 176
SOLUTIONS 179
8 Computer Organization & Microprocessor 180
1. Number System 180
2. General Register Organization 195

3. Micro programmed Control 196
4. Instruction Pipeline 198
5. Memory Organization 198
6. Microprocessor Architecture 207
7. Microprocessor Bus Organisation 210
8. Digital to Analog Converters 210
9. Boolean Algebra and Logic Gates 212
10. Combinational Logic Design 219
11. Flip Flop 224
12. Sequential Logic Design 233
13. Ring Counter 235
PRACTICE SET 236
SOLUTIONS 239
9 Data Structure 240
1. Introduction 240
2. Asymptotic Notation 240
3. Arrays & Stack 242
4. Queue 246
5. Binary Trees 249
6. Graph 256
7. Sorting 258
8. Hashing 266
PRACTICE SET 268
SOLUTIONS 271
10 Software Engineering 272
1. Introduction 272
2. Software Process Models 273
3. Clean Room Software Engineering 275
4. Requirement Analysis and Modelling 276
5. Unified Modelling Language (UML) 277
6. User Interface Design 279
7. Software Testing 280
8. Debugging 282
9. Error Seeding 282
10. Software Project Management 283
11. COCOMO 284

12. Risk Management 284
13. ISO 9000 Certification vs. SEI/CMM 285
14. Software Security 286
PRACTICE SET 287
SOLUTIONS 290
11 Programming Languages 291
1. Introduction 291
2. C Language 293
3. Object Oriented Programming Concepts 304
4. Java Basics 308
PRACTICE SET 316
SOLUTIONS 319
12 Practice Sets 320
Professional Knowledge Practice Set: 01 320
Professional Knowledge Practice Set: 02 325
Professional Knowledge Practice Set:03 330
Professional Knowledge Practice Set:04 337
Professional Knowledge Practice Set:05 343
ANNEX. 1. 349
1. Compiler 349
2. Interpreter 350
3. Loader and Linker 350
ANNEX. 2. 351
ANNEX. 3. 353
1. Oracle Grid Architecture 353
2. PL/SQL 353
3. PL/SQL Triggers 354
4. Big Data 355
