Directions (Q. Nos. 86 to 110) : Read the passages given below and answer the questions that follow.

Passage—1

As the New Year approached, like many others, I found myself making resolutions in my mind. The usual suspects made their appearance : waking up earlier, eating healthier, spending more time with loved ones, tackling household chores, being kinder to those I don't particularly like, driving cautiously, and taking the dog for a daily walk. But this time, I was determined to make my resolutions unique and achievable, learning from past failures.

I realized that one of the reasons why most of us fail in our efforts to self-improve is because our goals are often too ambitious, and we struggle to find time to follow through with them. So, I decided to keep my resolution to myself, limiting them to just two modest ambitions : exercising every morning and reading more every evening.

The first resolution was to exercise for just eleven minutes every morning before anyone else in my household was awake. The challenge was real, as dragging myself out of bed eleven minutes earlier than usual required significant self-discipline. But for the first two days, I managed to sneak down to the living room and jump around on the carpet without being caught. However, my cover was blown when my exhausted state after the exercise gave me away at the breakfast

table. Soon, my family caught on and my morning exercise routine became a subject of amusements for them. Despite their teasing, I tried to stick to it, but gradually, my enthusiasm waned, and I found myself back to square one by January 10th, giving up on the morning exercise routine.

Undeterred by my failure in the first resolution, I focused on my second resolution to read more every evening. I resisted the allure of television and spent a few evenings with my eyes glued to a book in my room. However, one cold and lonely night, I succumbed to the temptation of television and pretended to read while dozing off in front of the screen. It became a habit again, and I realized I had fallen back into my old ways.

Despite these setbacks, I refused to give up on my resolution to read more. In fact, I took a bold step and bought a book titled *How to Read a Thousand Words a Minute*. However, the irony was not lost on me that I hadn't found the time to read it yet, showcasing the challenges I faced in keeping up with my resolutions.

Passage—2

The world's smallest dog, the Chihuahua or the pocket dog is barely 1 kg to 2 kg as an adult! The Chihuahua is named after a Mexican State, but its roots can be traced back to China. Today this breed is popular choice among the dog lovers world over and their popularity seems to be ever increasing.

The main advantage of this breed is that they need no particular exercise. They are quite satisfied with their walks within their house. Being small, however, does not mean that they are dull, on the contrary they are sharp, alert animals, very strong in character. They are good guard dogs due to their strong chords. They have an inherent curiosity that makes them want to know what goes on within the house.

For show purposes, the maximum permissible weight is 0.9 kg to 1.8 kg. Chihuahuas are of two types, the long coated and the smooth coated. The long coated ones have flat or slightly wavy coats. The smooth coated ones are soft textured and glossy in appearance.

They can be of any colour. Their heads are apple dome-shaped and in some animals, the frontal areas of the skull do not fuse! The nose is short and the ears are at an angle of 45 degrees to the head. The dogs are slightly longer than the tail and the tail is carried like a sickle that just touches the back. The body on the whole is compact and has a graceful appearance. Occasionally, a

tail-less dog is born but tail cropping is not an accepted practice.

Compared to other pups, they require little care, and only the long-haired variety needs grooming. They tend to exercise themselves within the confines of the house. This makes them prone to have overgrown nails that need regular clipping. As far as their diet is concerned, they could be fussy and choosy eaters, but then almost all toy breeds are so ! They are intelligent and learn easily.

They are very active within the house and literally are burglar alarms. They are good with children and are loyal and devoted to the family. On the whole, the Chihuahua is quite a pet ! At just six inches, it is bundle of energy. Most people are surprised seeing these animals and the general awareness of this breed is still low. However, just one hurdle remains. Passage—3

The Ganges river dolphins occur in the Ganges-Brahmaputra river system primarily in India and Bangladesh. They are listed as endangered by the IUCN due to a probable population decline of at least 50% over the last fifty years and projected future population declines. Dolphins have been destroyed in the upper reaches of many rivers, the population has been fragmented by irrigation barrages and dry season habitat is further reduced by diversion of water. In comparison to the Ganges, the Brahmaputra river is lesser degraded and is therefore of great importance for persistence of the subspecies.

For this reason, a recent proposal by Oil India Ltd. to initiate seismic exploration using explosives and airguns along the bed of the Brahmaputra river to prospect for oil has potentially disastrous implications for Ganges river dolphins. Behavioural studies on dive time, surfacing interval and acoustic investigations were also carried out in two dolphin hotspots. Dolphins spent an average 107.3 seconds under water and 1.26 seconds above water. Mortality through fisheries bycatch was identified as one of the major threats to the Ganges dolphins in the Brahmaputra. Based on high abundance, potential for protection and possibilities for dolphin ecotourism, eight river sections were identified as potential protected areas and community-based conservation areas.

Passage—4

Emperor Akbar was greatly respected by the rulers and people of the other countries. Ambassadors visited his kingdom, and he too sent his ministers on foreign missions.

Once the Shah of Persia requested Akbar to send him Birbal, the wise and witty minister in Akbar's court. Akbar was pleased and instructed Birbal to go to Persia. The Shah of Persia had heard a lot about the wisdom of Birbal and he decided to test him.

When Birbal reached Persia, he was given a splendid reception. A meeting was fixed with the Shah. On the appointed day, Birbal was escorted to the palace and he noticed a strange sight. He saw that there were five thrones on which five Shahs sat in style. Their faces were similar and they wore clothes of the same style. He walked comfortably up to the five thrones and observed carefully.

He then bowed before one of them. Everyone was amazed because Birbal had indeed bowed before the true Shah. Nobody had a clue how he had arrived at the true judgement, so he was asked to explain. He replied that he had observed that the other four men appeared nervous and they kept looking at the real Shah and tried to imitate his moves. The Shah, on the other hand, looked relaxed.
