A passage is given with 5 questions following it. Read the passage carefully and choose the best answer to each question out of the four alternatives.

Our forefathers had lifestyles very much different from those we have today. Their life was based mainly on the concept of "Simple living and high thinking." People were satisfied with whatever they obtained after working hard. Excessive material wealth did not mean much for them. They derived mental satisfaction and enrichment which they aimed at.

The structural framework of our forefathers' families was different from that of ours. They lived in a cohesive joint family structure where they were happier than we are. They cared for each other. The siblings grew up with their cousins told. The bond of love which they shared cannot be easily found in the nuclear families of today. The family provided an emotional cushioning effect against tension and stress.

However, in the nuclear family, we are detached from the feelings towards our kith and kin. At times even the cousins do not recognize one another when they happen to be self-centred. Disputes in the family may lead to divisions. This may finally destroy the family psyche.

The joint family system provided a proper environment for the child to grow up. The values of respect, tolerance, responsibility, integrity, etc. were internalized in the child. In the long run, they became better human beings compared to those in the present generation. Our forefathers felt happiest if their children became 'honest' human beings.

But today we are happy only if we attain our coveted material ends. We are ready to resort to any means to attain that end. Our philosophy of life has turned out totally Machiavellian. Our forefathers had the vision to make India the best. To attain their ambitions, they were ready to make all sorts of personal sacrifices. Their happiness lay in that of the millions of Indian brothers and sisters.
