Q.10 Which of the following statements is NOT true?

Ans 1.

The area of the triangle with the largest side l always has an area less than $\frac{l^2}{2}$.

2.

If the sides of a triangle are in the ratio 13 : 5 : 12, then two of its angles are acute angles.

3.

The triangle formed by connecting the midpoints of the sides of a triangle has one-fourth area of the bigger triangle.

4.

The area of an isosceles triangle with sides $2a, 2a$ and $3a$ is $\frac{3\sqrt{3}a^2}{2}$.

Comprehension:

Read the given passage and answer the questions that follow.

Environmental or genetic influences antisocial conduct of a human being, which has an impact on behaviour, such as conduct disorder. In a recent study conducted, young people with conduct disorders had their brains examined, along with controls that were healthy and did not have the disease. The thickness of various regions of the cortex and the brain's outer layer was measured using the scanned images. It was demonstrated in the study that conduct disorder is a psychiatric condition rather than adolescent disobedience. Awareness, perception, attention, memory and language are all impacted by the cortex.

The findings of the study were unexpected. They demonstrated distinct disparities between adolescents whose behavioural issues began in adolescence and those whose issues began earlier in life. Although both groups were different from healthy controls, it was discovered that distinct regions of the cortex in the teenagers who had experienced early-onset behavioural issues were thicker in comparison to the healthy participants.

SubQuestion No : 33

Q.33 Select the most appropriate summary of the sentence given below.
It was demonstrated in the study that conduct disorder is a psychiatric condition rather than adolescent disobedience.

- Ans**
- 1. Conduct disorder is a mental condition rather than teen defiance.
 - 2. Conduct disorder is teen defiance and not a mental condition.
 - 3. Conduct disorder is neither a mental condition nor teen defiance.
 - 4. Conduct disorder is less of a mental condition and more of teen defiance.

Comprehension:

Read the given passage and answer the questions that follow.

Taekwondo is a form of empty hand martial arts combat that requires the athlete to use all parts of the body in competition. Taekwondo is a self-defence discipline; the name is derived from the Korean words 'tae', meaning kick, 'kwon', a punch or other blow with the hand or fist, and 'do', which is a way or method of operation. Among the general public, taekwondo is distinguished from other martial arts by its high speed, sweeping kicks and emphatic punches. As with judo, taekwondo was developed as a sport that is also representative of a moral code, where principles of loyalty, faithfulness, respect, and the preservation of an indomitable spirit form a significant part of taekwondo training. Beginning in 1945, shortly after the end of World War II and Japanese Occupation, new martial arts schools called kwans opened in Seoul. These schools were established by Korean martial artists with backgrounds in Japanese and Chinese martial arts. At the time, indigenous disciplines (such as Taekkyeon) were being forgotten, due to years of decline and repression by the Japanese colonial government. The umbrella term traditional Taekwondo typically refers to the martial arts practiced by the kwans during the 1940s and 1950s, though in reality the term 'Taekwondo' had not yet been coined at that time, and indeed each kwan (school) was practicing its own unique style of the Korean art.

SubQuestion No : 37

Q.37 Which of the following is NOT a principle of Taekwondo?

- Ans**
- 1. Faithfulness
 - 2. Indomitable spirit
 - 3. Loyalty
 - 4. Disrespect
